86 ytd

APS INTERVENTION REFERRALS

Contacts with students and families for CARE Coordination / Case Management. (attendance, CPS, crisis management, etc)

537 ytd

GOAL

The APS Family C.A.R.E. team strives to have all students physically, emotionally, and socially well with strong family support to ensure each student develops to their potential.

HIGHLIGHTS- CPS

One of our key goals through Family CARE has been to eliminate barriers between the school and CPS, with communication being the most significant challenge. Over the past few years, we have prioritized meeting with every CPS worker assigned to our district, introducing ourselves and addressing any questions they may have. This proactive approach has helped bridge the communication gap and strengthen our partnership, enabling us to better connect families with critical resources.

Additionally, some CPS workers have established monthly meetings with our Family CARE Coordinators, fostering ongoing collaboration and brainstorming ways to enhance support for our shared families. As a result, the school is now recognized as a trusted partner, actively working to remove obstacles and provide meaningful assistance to those in need.
